

Technology Stack

Date	27 JUNE 2026
Team ID	XXXXXX
Project Name	Visualization Tool for Electric Vehicle Charge
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS, JavaScript, Streamlit	User-friendly and responsive interface for entering health and well-being data.

2	Backend / Server-Side	Python, Flask	Processes user input, calculates well-being score, and handles business logic efficiently.
3	Database / Data Storage	MySQL	Securely stores user profiles, assessment data, and well-being reports.
4	Cloud / Hosting / Deployment	Render	Easy deployment, reliable hosting, and online accessibility.

5	Version Control & CI/CD	GitHub	Tracks code changes, supports collaboration, and manages project versions.
6	Third-Party APIs / Other Tools	Gemini API / OpenAI API (AI Recommendations)	Provides personalized well-being insights and AI-based suggestions to users.
