

Strategic Product Placement Analysis Flask Project Structure

Project Setup Documentation

July 11, 2026

1 Project Overview

This documentation outlines the structure and setup requirements for the `strategic_placement_app`.

2 Setup Instructions

To initialize and run this project:

1. Create a directory named `strategic_placement_app`.
2. Save the provided code snippets into their respective file paths.
3. Install the required dependencies: `pip install flask`
4. Run the application: `python run.py`

3 File Contents

3.1 `run.py`

```
from app import app
if __name__ == '__main__':
    app.run(debug=True)
```

3.2 `app/__init__.py`

```
from flask import Flask
app = Flask(__name__)
from app import routes
```

3.3 `app/routes.py`

```
from flask import render_template
from app import app

@app.route('/')
def index():
    return render_template('dashboard.html')
```

```
@app.route('/story')
def story():
    return render_template('story.html')
```

3.4 app/templates/base.html

```
<!DOCTYPE html>
<html lang="en">
<head>
    <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css" rel="stylesheet">
    <title>Product Placement Analysis</title>
</head>
<body>
    <nav class="navbar navbar-expand-lg navbar-dark bg-dark">
        <div class="container">
            <a class="navbar-brand" href="/">Dashboard</a>
            <a class="nav-link text-white" href="/story">Story</a>
        </div>
    </nav>
    {% block content %}{% endblock %}
</body>
</html>
```

3.5 app/templates/dashboard.html

```
{% extends "base.html" %}
{% block content %}
<div class="container mt-4">
    <h3>Product Placement Dashboard</h3>
    <tableau-viz src="https://public.tableau.com/views/YOUR_DASHBOARD_URL"
        width="100%" height="700px" hide-tabs></tableau-viz>
    <script type="module" src="https://public.tableau.com/javascripts/api/tableau.embedding.3.latest.min.js"></script>
</div>
{% endblock %}
```
